

Species found in demonstration restored (D) and best praxis restored (reference) (R) reaches in year 2014. The names of the reaches have been shortened to the four first letters of the names of the streams (Abmobäcken, Beukabäcken, Bjurbäcken, Falåströmsbäcken, Gargån, Hjuksån, Mattjokkbäcken, Mösupbäcken, Olsbäcken and Rågobäcken). Number 1 indicates that the species was found in one of the small plots (0.5 x 1 m) and number 2 shows that the species was found somewhere else along the 100 m long reach.
